NEW Yamaha Grizzly 550 breaks cover

2009 GRIZZLY 550 FI AUTO 4X4 WITH ELECTRIC POWER STEERING

The 500cc class has a new leader — a fully featured package based on its best-selling bigger brother, the Grizzly 700 FI, with a new 558cc powerplant and electric power steering. Electronic fuel injection means instantaneous cold starts and optimal performance in nearly any condition, from below sea level to 15,000 feet. The fully automatic Ultramatic® transmission is the most advanced drive system in the ATV world with a three-position feature that lets you switch between 2WD, limited-slip 4WD and fully locked differential 4WD with the push of a button. Fully independent long-travel four-wheel suspension features double-wishbone suspension front and rear for maximum control and comfort over rough terrain. The trick digital instrument panel boasts a multifunction LCD display with speedometer, odometer, dual tripmeter, hourmeter that counts hours that the engine is running, 4WD status, transmission position, clock and fuel gauge.

Choose from four different versions of the new Grizzly. The Special Edition Grizzly 550 adds cast aluminum wheels, water dripped body panels and special graphics. The Grizzly 550 Auto version gives you the same advanced engine/transmission/chassis set-up without the power steering while the Grizzly 450 Auto may be the most value-packed quad on the market.
